

Covid – 19 Risk Management Plan

The Corona Virus (Covid – 19) is a highly contagious and debilitating virus that has the potential to cause death in those infected. In order to minimise the risk of community transmission whilst engaging in activities facilitated by Anywhere Adventures, the following measures will be employed.

- Hand sanitiser will be readily available at all activities facilitated by Anywhere Adventures
- All shared equipment will be sanitised between each activity session
- Adults will be required (where feasible) to social distance from other adults and students
- All participants will be directed immediately to the bathroom to wash their hands thoroughly upon returning to the accommodation buildings at the conclusion of an activity

The above measures will be implemented in conjunction with those employed by both Nanga Bush Camp and Edgewater Primary School as per their individual Covid – 19 risk management plans
